HSS Hacks

Sponsorship Prospectus

December 10th - December 12th

online and in-person
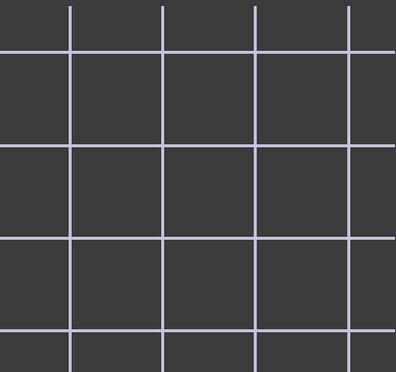

About Us

The coding club at Handsworth Secondary School is hosting its first hackathon. As the leaders of a coding club, we have always been keen on getting people interested in technology, programming and coding. This hackathon is another one of our attempts at inspiring more students to learn coding. We aim to be the biggest student-lead hackathon of Vancouver and also the biggest hackathon for students in Vancouver; But we can't accomplish any of these goals without your help.

What Sets Us Apart

Firstly, our hackathon is solely for **high school and university students.** By making the hackathon limited to a only students, we give the participants the opportunity to meet like minded people around the same age as them. It also makes the judging fairer as there will be no working professionals competing against students. Secondly, the hackathon is **both for beginners as well as coders with more experience.** We wanted to give beginners a chance to compete, but we also wanted the more experienced coders to be challenged, which is why HSS Hacks has both a beginner track as well as a pro track. There is also a track dedicated to high school students. Last but not least, HSS Hacks has come up with a **unique judging criteria** (here) which emphasizes the practicality and functionality of a project rather then design, which is what most hackathons tend to choose winners based on. This judging criteria also aims to make the judging process as unbiased as possible.

Why Should You Sponsor Us?

⊗ ⊕ ⊖

- By supporting us, you will be helping **inspire the future generation of developers**.
- HSS Hacks will be a place to **advertise and build your company image**
- Recruit enthusiast students in university who are **looking for jobs** or get high schoolers **interested in a career opportunity** in your company for after they graduate
- **Test and get feedback** for your company's product

Handsworth's Coding Club already has 50 members, so we will be expecting at least 50 participants **from Handsworth Secondary, who will be at the hackathon in person**. The other participants will join us through Devpost and discord server **online. We will be expecting a total of 250- 300 members.**

Sponsorship Opportunities

Mentioned below are only suggestions about the sponsorships you may offer. All of them are negotiable and you may contact us to request other types of sponsorships for our event. Any kind of help will be welcome.
